C A T A L O G

CORN LEADER BRANDS

59L29 3220A E-Z

107-109 DAY MATURITY

- Excellent ear flex supports lower to moderate populations
- Excellent plant emergence and vigor
- Great resistance to Goss' Wilt and solid overall resistance package
- Good silage appeal on this hybrid

63P75 TreceptaRIB

111-113 DAY MATURITY

- Strong performance over a wide geography
- Semi-flex ear type will allow for a wide range of planting populations
- Responds favorably to fungicides and irrigation
- Very good early plant vigor

63Z23 VT2PRIB

112-114 DAY MATURITY

- Strong central performance with good southern movement
- Semi-flex ear with very good test weight
- Strong late-season standability
- Very good stalk and root ratings

64B28 VT2PRIB

113-115 DAY MATURITY

- Very good stalks and roots with respectable late-season intactness
- Strong emergence and excellent early plant vigor for reduced tillage acres
- Excellent test weight on a semi-flex ear
- Great overall disease package

PLANT CHARACTERISTICS

BRAND	TECH	MATURITY	50% Silk	Black Layer	Cob Color	Ear Height	Ear Type	Husk Cover	Kernel Rows	Leaf Angle	Plant Height	Test Weight	Corn on Corn

HUSK COVER: Medium-Long = ML, Adequate = A

LEAF ANGLE: Semi-Erect = SE, Horizontal = H

CORN LEADER BRANDS

64Z68 HAW

113-115 DAY MATURITY

- Very high tolerance to Southern Rust and Goss' Wilt
- Dual-purpose hybrid widely adapted east to west
- Medium-long, flexible ears with 18-20 kernel rows
- Full canopied hybrid adapts well to moderate populations

65T29 VT2PRIB

114-116 DAY MATURITY

- Responds to increased nitrogen management
- Long flex ear with excellent test weight
- Full canopied hybrid with heat and drought stress tolerance
- Medium-tall hybrid with fast dry down

66Q32 3220 E-Z

115-117 DAY MATURITY

- Excellent roots with strong stalks
- Good overall disease protection
- Flexible ear allows maximum yield at lower populations
- Superior yield in zone and north

67A23 VT2PRIB

116-118 DAY MATURITY

- Full-season yield leader with excellent agronomics
- Lengthy flex style ears with 18-20 kernel rows and high test weight grain
- Impressive late-season appearance with strong overall disease package
- Recommended for continuous corn with very good silage potential

SOYBEAN LEADER BRANDS

3512XF

XF

3.5 RELATIVE MATURITY

- Light tawny with tan pod, solid standability
- Solid overall yield, but dominant ECB and West STS
- Great stress tolerance and emergence

3702XF

XF

3.7 RELATIVE MATURITY

- Very good SDS resistance and good tolerance to Brown Stem Rot
- Manage population on highly productive soils
- Acceptable standability on this medium-tall plant

3718NRXS

RR2X

3.7 RELATIVE MATURITY

- Medium-plus plant height that stands well
- Excellent to good Frogeye tolerance
- Stacked with STS and also is an excluder

3902XF

XF

3.9 RELATIVE MATURITY

- Taller plant with wider canopy
- Performs well out west
- Good standability and great emergence

RR2X - Roundup Ready 2 Xtend® Soybeans, **E3** - Enlist E3® Soybeans, **XF** - XtendFlex® Soybeans

Think Before You Bin Run

Verification Required The last patent on the original Roundup Ready® soybean trait expired a few years ago and U.S. farmers may legally plant saved seed from some varieties of soybean containing the Roundup Ready® soybean trait. However, it is important that you check with your seed supplier to determine if a specific Roundup Ready® soybean variety is covered by other intellectual property rights, and if so, the policy for saving seed of that variety.

Higher Seeding Rate A higher seeding rate may be required for bin-run Roundup Ready® soybeans compared to new branded seed.

Yield Loss Roundup Ready 2 Yield®, Roundup Ready 2 Xtend® and XtendFlex® soybean varieties typically have a higher yield opportunity than Roundup Ready® soybean varieties.

Cleanout Loss Loss of seed and/or shrink occurs during the seed cleaning and handling processes for bin-run seed.

Seed Treatment Costs Treating your seed will add costs—both the cost of the treatment and the application of that treatment.

Lost Income Every bushel of saved seed you plant is a bushel you're not selling as commodity grain.

Increased Seed Management If you plan to save and bin-run Roundup Ready® soybeans for planting, you will have to manage your harvest operations and grain storage so that the seed isn't co-mingled with other seed that's covered by intellectual property rights.

High Value of New Branded Seed

Latest Technology

- // High-yielding soybean technologies
- // Better variety options
- // Leading seed treatment options

Customer Service

- // Dealer agronomic support before and after the sale
- // Replant policy support
- // Convenient packaging and delivery

Reliable Germination and Quality

- // Rigorously tested and meets U.S. Federal Seed Act requirements
- // Free of seed-borne diseases
- // Properly stored and conditioned

Bayer is a member of Excellence Through Stewardship® (ETS). Bayer products are commercialized in accordance with ETS Product Launch Stewardship Guidance, and in compliance with Bayer's Policy for Commercialization of Biotechnology-Derived Plant Products in Commodity Crops. Commercialized products have been approved for import into key export markets with functioning regulatory systems. Any crop or material produced from this product can only be exported to, or used, processed or sold in countries where all necessary regulatory approvals have been granted. It is a violation of national and international law to move material containing biotech traits across boundaries into nations where import is not permitted. Growers should talk to their grain handler or product purchaser to confirm their buying position for this product. Excellence Through Stewardship® is a registered trademark of Excellence Through Stewardship.

ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS. It is a violation of federal and state law to use any pesticide product other than in accordance with its labeling. NOT ALL formulations of dicamba or glyphosate are approved for in-crop use with Roundup Ready 2 Xtend® soybeans. NOT ALL formulations of dicamba, glyphosate or glufosinate are approved for in-crop use with products with XtendFlex® Technology. ONLY USE FORMULATIONS THAT ARE SPECIFICALLY LABELED FOR SUCH USES AND APPROVED FOR SUCH USE IN THE STATE OF APPLICATION. Contact the U.S. EPA and your state pesticide regulatory agency with any questions about the approval status of dicamba herbicide products for in-crop use with Roundup Ready 2 Xtend® soybeans or products with XtendFlex® Technology.

Roundup Ready® Technology contains genes that confer tolerance to glyphosate. **Roundup Ready 2 Technology** contains genes that confer tolerance to glyphosate. **Roundup Ready 2 Xtend® soybeans** contain genes that confer tolerance to glyphosate and dicamba. Products with **XtendFlex® Technology** contain genes that confer tolerance to glyphosate, glufosinate and dicamba. **Glyphosate** will kill crops that are not tolerant to glyphosate. **Dicamba** will kill crops that are not tolerant to dicamba. **Glufosinate** will kill crops that are not tolerant to glufosinate. Contact your seed brand dealer or refer to the Bayer Technology Use Guide for recommended weed control programs.
